

MANUFACTURING TECHNICIAN (M/F)

Cellaion SA is a global innovator in liver therapeutics whose mission is to bring life-saving treatments to reduce the need for liver transplantation. Our lead clinical program, derived from our patented cell technology platform HepaStem®, is designed to benefit from its immune-modulatory and anti-fibrotic properties.

We are currently hiring a Manufacturing Technician.

YOUR RESPONSIBILITIES:

- Cell expansion of human liver cells in aseptic conditions.
- Media preparation for cell culture and formulation.
- Liver cells isolation in aseptic environment.
- Record of relevant environmental and manufacturing parameters.
- Cleanroom daily cleaning, sanitization, and maintenance level 1.
- Perform tasks in accordance with the manufacturing planning.
- Writing of procedures, protocols, deviations.
- Participate in Process Development and R&D activities.
- Work in compliance with Good Manufacturing Practices (GMP).
- Is part of 24/7 surveillance network.

YOUR PROFILE:

- Educational background in biological or biomedical sciences.
- Experienced in stationary cell culture and in aseptic manipulation in a pharma GMP environment.
- Fluent in French (written and oral) and professional proficiency in English.
- Flexible and quality oriented.
- Hands-on problem solving and proactive attitude.
- Real Team player.

If you want to join our team, you may apply for this position by sending your CV and application to hr@cellaion.com.

For information, resumes and application letters received will be retained as long as the employment's offer is valid and will be destroyed as soon as the position is filled. We will contact you in case we wish to keep your CV after the recruitment period.
